

# Kunj Garala

📍 Junagadh, Gujarat, India | [kunjgarala55@gmail.com](mailto:kunjgarala55@gmail.com) | +91 6353623425  
[Portfolio](#) | [Github](#) | [Linkedin](#) | [X](#) | [LeetCode](#)

## Education

**B.Tech. (Computer Engineering)** – 8.36 CGPA (Up to 4rd Semester)  
**CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY (CHARUSAT)**  
2023 – 2025 (Currently Pursuing)

## Technical Skills

- **Web Development:** HTML, CSS, Bootstrap, Tailwind, React
- **Programming Languages:** C, C++, Java, JavaScript
- **Frameworks & Libraries:** Spring Boot, Spring MVC, Spring Security, Spring Framework, Hibernate (ORM)
- **Databases & Tools:** MySQL, SQL, GitHub, Postman, VS Code

## Courses

- Data Structures and Algorithms
- Software Engineering
- Database Management System

## Projects

### [EduConnect – University Community Platform](#) 🔗

- **Tech Stack:** Java, Spring Boot, Spring Security, JWT, WebSockets, PostgreSQL, React.js, AWS S3
- Built a web application for students to connect and collaborate. Features include user login with JWT, student profiles, search and friend connections, real-time chat with groups, event creation and student registration, and a Q&A board with voting and answers. Added file uploads to AWS S3 (resumes, images, docs) with secure restrictions. Designed a React.js frontend and Spring Boot + PostgreSQL backend, ensuring scalability, security, and responsive UI.

### [AI-Powered Kitchen Inventory Management](#) 🔗

(Hackathon Project)

- **Frontend Developer | React.js, Tailwind CSS, Google Gemini AI**
- Developed the **frontend** of an AI-powered kitchen inventory management system using React.js and Tailwind CSS, ensuring a seamless and responsive user experience. Implemented Google Gemini AI to analyse inventory and predict suitable food products based on available items. Collaborated with backend developers to integrate AI-powered image recognition for food quantity estimation, optimizing system functionality.

### [FarmEase](#) 🔗

- **Frontend Developer | React.js, Tailwind CSS**
- Developed the frontend of a farmer-centric e-commerce platform using React.js and Tailwind CSS, enabling direct farmer-to-consumer sales while integrating APIs in collaboration with backend developers to enhance platform functionality and optimize performance.

### [Spotify Clone](#) 🔗

- **Technologies Used:** HTML, CSS, JavaScript
- Built a functional Spotify clone with an intuitive UI, enabling users to play music seamlessly while implementing a dynamic volume control feature and ensuring a clean, responsive interface for smooth interaction.

## Experience

### Web Design Intern – MERN Stack

Brainybeam Info-Tech Pvt. Ltd., Ahmedabad, Gujarat  
May 2025 – June 2025 (30 Days)
